TECHNICAL SERVICES

Technocraft Industries is a leader in the design of Formwork and Scaffolding products. Technocraft's Design Department receives all of the vital and necessary technical information that is related to the project and designs the most optimum solution in accordance with the project criterion and the applicable standards.

PRODUCT RANGE

Technocraft industries (I) Ltd. has developed new and innovative scaffolding solutions since 1998. Now, Technocraft has a complete range of Scaffolding Systems, Scaffold Fittings, Formwork products, and Shoring systems.

QUALITY STANDARDS

Technocraft Industries (I) Ltd. implements BS and ASTM standards in the designing and production of Scaffolding and Formwork systems. Production is strictly controlled within the tolerance of these standards. All products are designed and produced by its skilled workforce, applying the latest production methods with modern machinery. Our Quality Control team, under the supervision of mechanical engineers, is selected from long serving and experienced foreman. All products are checked during each production step and are compared with production drawings and specifications. The company is strictly bound to the concept of ISO and "Total Quality Management". The application of this management system is maintained and is a part of day to day operations.

TECHNICAL KNOW HOW

Technocraft Industries (I) Ltd. has been working in this field since 1998 and with our experienced technical team we have the capacity and know how about the designing of scaffolding & formworks systems. We have In-depth knowledge about castings. Forgings, Press working and Fabrications which allows us to carry the production in the highest professional manner. Knowledge and experience over design and structural calculation work enables Technocraft Industries (I) Ltd. to provide design services to projects for Scaffolding and Formwork.

EDGE OF TECHNOCRAFT OVER OTHERS

One advantage to our manufacturing process, is our strict compliance with all applicable industry standards and tight parameters as per our customers drawings. Another advantage is that Technocraft implements Lean Manufacturing throughout the entire process. Technocraft prides itself on being one of the few manufacturers of scaffolding in the world where the entire plant runs on the Japanese Lean Manufacturing system. Also, our Material Planning, Procurement, and Operational Efficiencies are based on TPM and TQM systems.

MANUFACTURING FACILITY

- Slitting-Capacity 1800mm wide up to 8mm thickness
- Tube Mills - ½" to 5" NB pipes with 4000 T/month
- Special Profile Rolling Section Mill
- Press Shop-up to 1000T capacity presses
- Forging Shop - 1600T Press, with Magnetic Particle Testing
- Fabrication - Robotic, Automatic, Semi-automatic and Manual MIG-MAG Welding machines.
- Electro Galvanizing
- Shot Blasting - 1500mm wide, 10 T/hr.
- Dip Painting, Quick Dry Spray Painting and Powder Coating
- Complete painting unit
- Complete Hot Dip Galvanising Unit 4000 tons/month

Description: Standards /Verticals

Use: Standards are the vertical component of ring lock scaffold. Rings or rosettes are spaced every 19.7" (500 mm) on the tube and provide a point of attachment for various components that are used to create a scaffold structure.

Material: High Strength Steel

Finish: Hot Dip Galvanized

STANDARDS/VERTICALS (WITH BOLTED SPIGOT)

PRODUCT CODES	SIZE	WEIGHT IN KGS	WEIGHT IN LBS
U-RLV-3000	3.0m (9'-10")	14.7	32.3
U-RLV-2500	2.5 m (8'-2")	12.3	27.1
U-RLV-2000	2.0 m (6'-6")	9.6	21.1

U-RLV-500	0.5m (1'-7")	3.1	6.9

Description: Base Collar (Starter)

Use: The Base Collar is the foundational piece for building a Ring Lock structure. It sits on the base jack or swivel jack providing the initial connections for ledgers and allowing the structure to be easily squared and levelled.

Material: High Strength Steel

Finish: Hot Dip Galvanized

BASE COLLAR

PRODUCTCODES	WEIGHT IN KGS	WEIGHT IN LBS
U-RLBC	1.7	3.8

Description: Ledger / Transom

Use: Ledgers and Transoms are horizontal members that are used to form a scaffold bay by setting the distance between the standards. They also can be used for the top rail and knee rail as part of the guard rail system. Shorter ledgers, called transoms, can be used to support plank. AAIT/ Technocraft recommends using a double ledger as a transom for bays 6 feet or wider.

Material: High Strength Steel

Finish: Hot Dip Galvanized

Description: Right Angle Adapter Clamp

Use: The right angle adapter clamp is used in the tying of the tie tube perpendicular to the standard vertical of the scaffolding system. The Ledger can be wedged to the vertical standard ring.

Material: Structural steel

Finish: Self colour

RIGHT ANGLE ADAPTER CLAMP

PRODUCT CODES	WEIGHT IN KG	WEIGHT IN LBS
RAC	1.4	3.1

Description: Swivel Adapter Clamp

Use: The swivel adapter clamp is used in the tying of the tie tube to the standard vertical of the scaffolding system, it can be swivel at any angle with respect to the vertical standard. The Ledger can be wedged to the vertical standard ring.

Material: Structural steel

Finish: Hot Dip Galvanized

SWIVEL ADAPTER CLAMP

PRODUCT CODES	WEIGHT IN KG	WEIGHT IN LBS
SAC	1.6	3.6

Description: Standards & Vertical

Use: Standards are the vertical component of Cuplock scaffold. Cups are spaced every 19.7" (500 mm) on the tube and provide a point of attachment for various components that are used to create a scaffold structure.

Material: High Strength Steel

Finish: Hot Dip Galvanized

CV10	0.5m (1'-7")	3.4	7.4

Description: Ledger / Transom

Use: Ledgers and Transoms are horizontal members that are used to form a scaffold bay by setting the distance between the standards. They also can be used for the top rail and knee rail as part of the guard rail system. Shorter ledgers, called transoms, can be used to support plank. AAIT/ Technocraft recommends using a double ledger as a transom for bays 6 feet or wider.

Material: High Strength Steel

Finish: Hot Dip Galvanized

ADJUSTABLE U-HEAD 8" X 9"

PRODUCT CODES	EXTENSION IN INCH	WEIGHT IN KG	WEIGHT IN LBS
RUSJ	450mm (17.7")	7.9	17.4

Description: Adjustable Two Way U-Head

Use: The Adjustable Two-way U-Head is a versatile part that can be used at the top or bottom. The U-Shaped head is used to centre the scaffold on a beam when building up off of a beam or when supporting a beam in a shoring application.

Material: Structural steel

Finish: Hot Dip Galvanized

Description: 9" Wide Steel Mesh Plank - SSP Hook

Use: 9" wide high profile steel mesh planks are used to provide walkways and work areas on scaffolds when a build-up of debris is a concern. The expanded metal surface allows for debris, from processes like sandblasting & painting to fall through to prevent the scaffold from being overloaded. Good house-keeping is still required when using this plank.

Material: Structural steel

Plank Width: 9" / 228.0mm.

Finish: Hot Dip Galvanized.

T10K-SBPUH810	8" x 10"	4.0	8.8
T10K-SBPUH85	8" x 5"	2.7	6.0

Description: 7" X 7" Base Plate (For Frame)

Use: Base Plates can be used in lieu of the Base Jack below the Shoring Frame leg when Minimum height is required.

Finish: Hot Dip Galvanized.

7" X 7" BASE PLATE (FOR FRAME)		
PRODUCT CODE	WEIGHT IN KG	WEIGHT IN LBS
T10K-SSJ36	2.5	5.5

Description: 7" X 7" Base Plate (For screw)

Use: Base Plates can be used in lieu of the Base Jack below the Shoring Frame leg when Minimum height is required.

Finish: Hot Dip Galvanized.

7" X 7" BASE PLATE (FOR SCREW)		
PRODUCT CODE	WEIGHT IN KG	WEIGHT IN LBS
T10K-SBPS77	2.7	5.9

Description: Rivet & Hair Pin Cotter

Use: Rivet & Hair Pin Cotter locks shoring frames with each other effectively using connector pin and aligned them vertically.

Finish: Electroplating

*TO BE SUPPLIED IN LOOSE CONDITION, IN SEPARATE BAG.

RIVET & HAIR PIN COTTER

PRODUCT CODE	WEIGHT IN KG	WEIGHT IN LBS
T10K-SCRP	0.2	0.4

Description: 23" Side Bracket

Use: Side bracket with planks provide a platform for the workers working on shoring frames.

Finish: Hot Dip Galvanized.

23" SIDE BRACKET

PRODUCT CODE	WEIGHT IN KG	WEIGHT IN LBS
T10K-ASB-23-G	6.0	13.2

Description: Post Shore

Use: Post Shores are used in various shoring and reshoring applications.

Finish: Hot Dip Galvanized.

Let's Talk Quality.

AAIT Technocraft holds the most certificates of quality standards and maintains the most robust quality control management in the scaffolding industry. Each hot dipped galvanized product is backed by our multi-million dollar US and global insurance policies. Our welding department is certified as per EN 1090-2 standard by SLV Labs of Munich, Germany.

Schweißtechnische Lehr- und Versuchsanstalt Mannheim GmbH
